

Students are required to strictly adhere to the following presentation phases and deadlines. All presentations will be conducted **in front of the assigned project guide**, and **the decision of the project guide will be final in all matters**.

Minor Project Presentation Schedule

1st Presentation – Project Definition Finalization

 **On or before 31st December 2025**

Objective:

- Finalization of project title and problem statement
 - Project objectives and scope
 - Technology stack selection
-

2nd Presentation – System Design & Flow

 **Between 12th January to 19th January 2026**

Objective:

- System design and process flow
 - **DFD (Data Flow Diagram)**
 - **ER Diagram**
 - **Use Case Diagram**
-

3rd Presentation – Module Finalization

 **Between 5th February to 7th February 2026**

Objective:

- Finalization of project modules
 - Explanation of module-wise functionality
 - Implementation plan and task distribution
-

4th Presentation – GUI & Basic Functionality

 **Between 25th February to 28th February 2026**

Objective:

- **Properly designed and functional Project GUI**
 - Implementation of **basic core functionalities**
 - Demonstration of working modules
-

Final Report Submission

 **On or before 10th March 2026**

- Hard copy and/or soft copy submission as instructed by the guide
 - Final report must include all approved changes and enhancements
-

Important Conditions

- Students must strictly follow the **instructions and timelines given by their project guide**.
- All submissions and presentations must be **original and functional**.
- **Plagiarism or non-working projects will not be accepted**.
- Failure to meet deadlines may result in **penalties or non-evaluation**.
- **The project guide's decision will be final and binding** regarding approval and evaluation.

Students are advised to prepare accordingly and maintain regular communication with their respective project guides.

Future Enhancement (Major Project – 7th Semester):

Students must clearly define **future enhancements**, which will be implemented during the **7th semester Major Project**, including but not limited to:

- Advanced features and modules
- API / Cloud integration
- Security and performance improvements
- Deployment and scalability
- AI/ML or Data Analytics components (if applicable)

The same project will be **extended and upgraded** for the Major Project based on the approved future enhancement plan.
