ACKNOWLEDGEMENT

Behind any major work undertaken by an individual there lies the contribution of the people who helped him to cross all the hurdles to achieve his goal.

It gives us the immense pleasure to express our sense of sincere gratitude towards our respected guide **Name of the guide**, Assistant Professor for his persistent, outstanding, invaluable co-operation and guidance. It is our achievement to be guided under him. He is a constant source of encouragement and momentum that any intricacy becomes simple. We gained a lot of invaluable guidance and prompt suggestions from him during entire project work. We will be indebted of him forever and We take pride to work under him.

We also express our deep sense of regards and thanks to **Prof. Sumitra Menaria**, Assistant Professor and Head of CSE/IT/ICT Engineering Department. We feel very privileged to have had their precious advices, guidance and leadership.

Last but not the least, our humble thanks to the Almighty God.

ABSTRACT

The primary objective is to design and manufacture a machine to perform the task of paper stapling and folding automatically to reduce the wastage of human efforts, time and cost. The machine will be fed the required quantity of page. Then the stapling operation will be performed and then the answer sheet will be folded by passing it between a set of rollers. It will serve to schools and colleges to make answer sheets in quiet easy and economic manner.
